Above is an actual photograph of the Gladiolus bulbs offered at 25 for $1.00. Please notice that the bulbs measure 1" to 1½" across (about 4" in circumference). These bulbs will bloom the first year, and for many years thereafter.

Every color of the rainbow—red, pink, white, lavender, blue, orange . . . plus smokies and combinations. Some are one color solid, and some are blotched. And every bulb is clean. vigorous, and of first class quality. They have been State Inspected, too.

These are all named varieties of choice gladiolus of plain and ruffled petals. Enjoy the glorious beauty of glads in your garden, and in your home. Remember, they are one of the very best cut flowers, they are easy to arrange, and the flowers last a long time. Plant some bulbs each week for several consecutive weeks and they will bloom accordingly, giving you fresh flowers over a longer period. And you will find gladiolus one of the easiest of all flowers to grow.

We priced these glad bulbs low to make new friends, so don't miss this very worthwhile offer.

40 GLAD BULBS for only **$1.00** PPD. No. BG972XL

Each Bulb ¾" to 1" Diameter

These are not the real large size bulbs, but neither are they the small bulblets so often offered as a "bargain". These bulbs are ¾" to 1" in diameter—a size large enough to bloom the first year planted. They have been State Inspected, which means that they are clean, healthy, vigorous bulbs. This is an assortment of the world's finest gladiolus varieties—a rainbow of colors in plain and ruffled petalled kinds, at a money-saving price.

80 'Row Run' GLADS for only **$1.00** PPD. No. BG947XL

Bargain in Mixed Sizes

We call these "Row Run" because the bulbs are of various sizes, just as they come from the field—big ones, regular-sized ones, medium-sized ones, and small ones. But no bulblets, no culls!

Every bulb is from a named variety (we grow nothing else), and is a clean, healthy, vigorous specimen that will bloom the first year. So, if you will take them "row run", and save us the expense of grading, we'll give you a super-bargain price.

ALL 2-YEAR-OLD FIELD-GROWN PLANTS GUARANTEED TO BLOOM THIS YEAR

Frankly, we have a surplus of No. 2 Grade rose plants because, when we dig our rose plants to sell, most of them go into our Big No. 1 Select Grade, or the medium size No. 1½ Grade, which we list in our catalog. But that leaves the smaller No. 2 plants out.

Our solution to this problem for several years has been to make this reduced price offer on these surplus No. 2's. The offer has proved so popular, and we have received many letters from our customers praising these roses, that we are repeating the offer again this year

These No. 2's are of the same high quality varieties as the No. 1's. If they were only a little larger, they would be worth $1.00 to $1.25 apiece. They are healthy, husky and clean — no culls or damaged plants. They bloomed in our fields last year, and will bloom for you this year and, with a little care, will grow just as big and just as beautiful as any rose you can buy at any price.

These are our regular, well-known named varieties, but we ask that you allow us to ship by color, not name. This will allow us to sell all of them. We will see that you get a good color assortment. And of course every plant is covered by Henry Field's money-back guarantee.

This is a fine opportunity for you to pick up a real bargain not offered in our big catalog. So order these rose plants now.

(No climbers included in this collection.)

Fastest-Growing Shade Tree in the U.S.A.!

DISEASE-RESISTANT "Green King"® HYBRID ELM

from Henry Field's

If you want shade in a hurry, yet want a tree that is hard-wooded, Henry Field's "Green King"* Hybrid Elm is the tree for you. It grows faster than any other tree in the United States, bar none—even faster than the soft-wooded, short-lived poplar. It evidently is a hybrid (although we do not know the cross), combining beauty and permanence with an extremely rapid growth.

Extra Hardy—Grows Anywhere

Henry Field's "Green King"* Hybrid Elm thrives in any normal type soil, and keeps right on growing in weather hot or cold, wet or dry. The leaves are large and dark green; the branches straight and strong, with great resistance to breakage from high winds, ice, and snow.

The above Henry Field "Green King"* Hybrid Elm is typical of the thousands now growing throughout the United States. This tree is highly resistant to the serious elm diseases.

18-Year Record of Disease Resistance

Henry Field's "Green King"* Hybrid Elm is highly resistant to the serious elm diseases. Many City Park Commissions that have prohibited the planting of vulnerable common elms enthusiastically approve the planting of Henry Field's "Green King"* Hybrid Elm.

*"Green King" is a registered trade mark owned by the Henry Field Seed & Nursery Co.

WARNING: Not all hybrid elms are the same; to be sure, get Henry Field's "Green King"* Hybrid Elm.

Cyclone

A GREAT NEW STRAWBERRY DEVELOPED AT IOWA STATE UNIV.

PRODUCTIVE, FRAGRANT, DELICIOUS!

B4106L—We are privileged to be among the first few nurseries offering this new June bearing strawberry. It is an origination of Iowa State University, where it formerly was known as No. 1-35. There it first attracted attention for its sugar sweetness and general high quality. In intensive tests covering a period of years, it proved to be early in bearing, very productive, a good plant maker, and it consistently bore large, well-shaped fruit. Most outstanding, however, was the delicious flavor of its fragrant, sweet fruit, superior without exception to the many ~~other~~ varieties in this college testing ground. The freezing tests proved it an exceptionally good freezing berry, also.

In yield tests, Cyclone has out-yielded its nearest competitor by more than 50 percent—*producing 11,400 pounds per acre.*

Compact Size and Delicious Flavor Make These Just Right for Home Gardeners

Dwarf Fruit Trees are much smaller than regular-sized fruit trees yet their fruit is of full size and top quality. In fact, the dwarf apple trees usually bear larger fruit. And, as a general rule, dwarf fruit trees start bearing sooner—often the second year.

Remember, too, that you can plant up to 3 dwarf fruit trees in the same area usually needed by one regular size fruit tree.

The following dwarf apple trees are grown on Malling IX dwarfing root stock. They will grow to 8 to 10 feet tall at maturity.

Blueberry bushes thrive almost anywhere in the U. S. if the soil is sour, or acid. If your soil is sweet, simply add some Aluminum Sulphate when planting. A2027L—BLUERAY. This new variety produces huge (marble-size), juicy fruit that has a delicious flavor. Berries are borne in large, tight clusters. Vigorous growing bush is very hardy and also makes a fine ornamental shrub. **1.98 each; 3 for 5.25, postpaid.**

A2028L — PEMBERTON. One of the finest of the newer varieties. Outstanding for its vigorous growth and masses of very large berries. Fine, sweet and firm. Ripens midseason. Excellent ornamental shrub. **1.98 each; 3 for 5.25, postpaid.**

Very productive. **1.98 each; 3 for 5.25, postpaid.**

A2026L—HERBERT. Many people think this new variety has the finest flavor of any cultivated blueberry. Your friends will marvel at the beauty and size of these new named varieties of Double Petunias. The flowers on all of them are 3 to 4 inches across, and heavily ruffled. Each flower is a blend of different shades of one color, accented by brighter veinings.

The plants grow low and broad, rather than upright. They make wonderful house plants, and simply can not be beat for window boxes, porch boxes, edgings along the walk, and in the flower garden. We planted a bed of each color in our trial grounds and they looked beautiful. Needless to say, we picked many bouquets. They do best in sunshine, but practically take care of themselves.

HENRY FIELD'S GREEN THUMB

LIQUID PLANT FOOD

Feed Hungry Plants This EASY Way!

Since Green Thumb was first listed in our catalog several years ago, we have received hundreds of letters from our customers telling us how clean and easy it is to use, and how much good it did their lawn and shrubs, trees, flowers, vegetables and house plants.

It Costs Less

One package of 16 ounces makes 30 gallons of liquid fertilizer. You can't miss either, because directions on the container tell how much to use for various plants, and your lawn. You'll be surprised how little it costs to fertilize with Green Thumb.

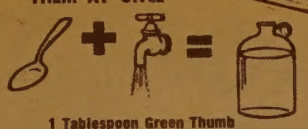
Goes to Work Right NOW!

You just mix 1 tablespoonful with a gallon of water and you have liquid plant food—a clear green liquid—odorless and non-poisonous—and it contains the nutrition growing things need. And, being liquid, it goes directly to the roots so the plants perk up right away.

No Mess—No Mixing—No Digging

If your plants get hungry and sickly, with yellowish leaves, stunted growth, small fruit and colorless flowers, they need food and water and cultivation. Now

LIQUID FOOD SOAKS DOWN TO ROOTS AND STARTS NOURISHING THEM AT ONCE



1 Tablespoon Green Thumb
Plus Water Makes
1 Gallon of LIQUID PLANT FOOD

you can spend hours fertilizing these hungry plants, or you can use Green Thumb and do a good job in a short time. We don't know of anything better for starting newly planted things off right. Performs wonders in all kinds of soil.

GREEN THUMB is composed of important plant nutrients, plus Vitamin B-1. By making it available in a liquid form, it goes immediately to the roots of hungry trees and plants. In just a matter of days, you can see results. **No. 4420L—16 ounce package, only 1.30 (makes 30 gallons of liquid plant food); 3 lbs., 3.00 (makes 90 gallons); 5 lbs., 4.50 (makes 150 gallons); 10 lbs., 8.00 (makes 300 gallons). Our Choice HYBRID SWEET CORN

THESE THREE FAMOUS HYBRIDS ARE IDEAL FOR BOTH HOME OR MARKET GARDENERS

Hybrid sweet corn is a great improvement over old open pollinated corn. Our hybrids have uniform maturity, extremely high yields, and disease resistance. Plant almost as soon as you can get them into the ground in spring. A half pound of seed is enough for 100 hills. Use 10 to 12 lbs. per acre. Plant every 10 days 'til mid-July for corn all summer.

FOR CORN EAR WORMS: Use Henry Field's Bug Dust on silks when 1 inch long and at 3 to 5-day intervals until corn is ready to eat.

All of our sweet corn seed is treated with a special chemical that protects seed and stimulates growth of feeder roots; assures better, faster germination, and gives bigger yields.

FIELD'S GOLDEN DELICIOUS

5079L—(85 days). Here is a sweet corn we are proud to call our own. It is the finest quality sweet corn we have ever eaten... every succulent ear has 16 rows of tender sweetness. And it is the best ever for home use and freezing. **Large Pkt. 25c; ½ lb. 70c; 1 lb. 1.20; 3 lbs. 3.15, postpaid.**

Use in garden. Gets bugs already there; keeps out others.

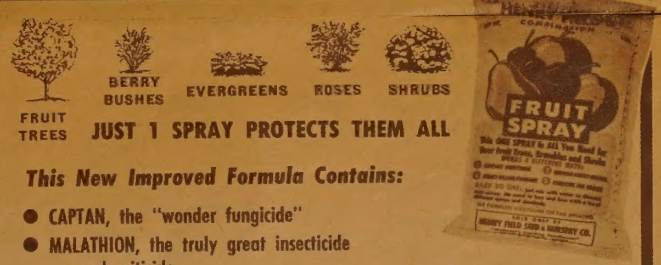
Dust flowers, shrubs to protect against bugs and disease.

Mix with water for powerful fly spray.

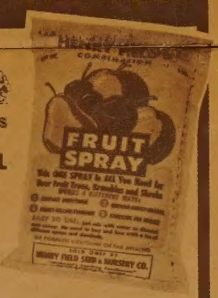
Easy to apply with an ordinary portable pump sprayer. Tall trees and shrubs are no problem.

Now You Need Not Mix a Lot of Different Chemicals

ONLY ONE SPRAY DOES THE JOB!



JUST 1 SPRAY PROTECTS THEM ALL



This New Improved Formula Contains:

- CAPTAN, the "wonder fungicide"
- MALATHION, the truly great insecticide and miticide
- METHOXYCHLOR for added insect control

JUST MIX IT WITH WATER, THEN SPRAY PLANTS

The trouble with spraying fruit trees in the past has been that you had to buy a lot of different chemicals and get a spray chart, and then try to figure out what to mix for each different fruit and for each different time of the season.

But with Henry Field's Combination Fruit Spray, you buy just one package and use it for different fruits at various times during the season. It stops almost every disease and insect that bothers fruit trees with no guessing and no fussing around. And when used as directed, it does not harm the trees nor impart an undesirable flavor to the fruit.

PROTECTS ORNAMENTALS TOO

You use Henry Field's Combination Fruit Spray on most ornamental shrubs too. It helps check red spider on evergreens and certain other insects and fungi that attack ornamental shrubs.

HOW MUCH TO ORDER

You use one pound with 12 gallons of water. That's enough to spray three average-size fruit trees five times during the season. Figure about one-half that much for young trees not yet bearing.

GUARANTEE

Henry Field's Combination Fruit Spray will give you satisfaction or we will refund your money. No arguments.

50 Plants "AMOOR RIVER" PRIVET HEDGING

Partially Pruned for Planting

The Ideal Trimmed Hedge

Amoor River Privet is the most widely used, and most popular, of all trimmed hedges. Not only is it hardy and fast-growing, but the more it is trimmed, the more dense and beautiful it becomes. Its natural, untrimmed habit of growth is bushy, yet upright. The leaves are of a lustrous green color. Its early white flowers are followed by jet black berries.

Plant it two or three feet apart for a tall, trimmed hedge or, with the same planting distance, it could be allowed to grow naturally and untrimmed to form a screen up to fifteen feet tall. Most people plant it 9 to 12 inches apart for a low, thick hedge. For this it is ideal.

Many Items of Seed and Nursery Stock REDUCED IN PRICE

At this time of the year, we find we have on hand a surplus of certain varieties of seeds and nursery stock. This is because, no matter how carefully we plan, some of our crops produce more than others. If you grow things yourself, you know how this happens.

Now we don't want to finish our season with these surpluses on hand. So, to get them out where they will do some good, we make special offers on them.

But this is only part of the story. We realize that this folder reaches many people who don't receive Henry Field's catalog, and who have never dealt with us. Perhaps you are one of these people. For you, we have chosen from our giant-sized catalog some of our finest bargains in high grade seeds and nursery stock. Eliminate the Shock Of Transplanting—Use JIFFY POT

The Pot You Plant!

Jiffy Pots are made in Norway of pressed peat, with nutrients added, and they do wonders for your plants. Start your plants in a Jiffy Pot, letting the roots grow right through the pot walls. The pot provides ideal root aeration and holds moisture a little longer around the roots. When you put the plant outdoors, plant the pot and all. It adds organic peat to improve your soil too.

This tomato plant, started in a Jiffy Pot, can be transplanted to your outdoor garden with no delay in growth.

Plants in full bloom are free of shock from transplanting.

America's Most Exotic House Plant

"BIRD OF PARADISE"

N1127L—The blossoms of "Bird of Paradise" (Streletzia regina) are gorgeous flowers 3 to 5 inches long with an unusual shape and striking colors of red, yellow, blue and orange. It looks like an exotic, tropical bird of paradise. The plant gets about two or three feet tall, and continues to make a wider clump. It usually begins to bloom when it has nine or more leaves, and a mature plant has 25 to 30 flowers at one time.

The cut flowers last two to three weeks. Florists prize the blossoms, sell them retail at from $15.00 to $25.00 per dozen. Yet this beautiful plant is easy to grow, and lives for many years, constantly increasing in size and beauty. It is sun-loving, but does well in partial shade. A tiny amount of plant fertilizer every two or three weeks is helpful. Because this plant probably is new to you, we send complete cultural directions with each plant.
